

## DEEP TRUTH: Igniting the Memory of our Origin, History, Destiny and Fate by Gregg Braden

Gregg Braden postulates that whereas the 20th century was the age of knowledge, the 21st century will be the age of wisdom. Living on the edge of so many tipping points all at once gives us the reason, and the rare opportunity, to change the way we think and live.

This comes at a time when an explosion of new discoveries throughout the sciences has left little doubt that many of our long-standing views about life, our world and our bodies have to change for the simple reason that they are wrong.

In this, his most recent book, the author leads us through an understanding of the false assumptions that have derailed our ability to deal effectively with everything from war and terrorism to climate change. Our old ways of thinking - which include believing in survival of the fittest, the need for competition, our separation from nature and that civilization is only 5,000 years old - have brought us to the brink of disaster. He identifies six areas of discovery (and the facts they reveal) that will radically change the way we've been led to think about our world and ourselves in the past. This is a book that is not only informative, but empowering. If the author is right in saying that our choices for survival all point back to the way we think about ourselves in the world then the deep truths he lays out for us are a step into our future - if we chose to act on them.

## TASTING THE UNIVERSE: People who see Colours in Words and Rainbows in Symphonies by Maureen Seaberg

As the cover indicates, this is both a spiritual and scientific exploration of synesthesia. Add artistic as well. As a journalist for 20 years, Maureen Seaberg is herself a synesthete. She took on the task of exploring this little-understood phenomenon by not only surveying the literature, but inter-

*The Christmas story of the birth of the Child of Light in a cave, and the journey of the magi through the night to find him contains one of the eternal esoteric truths.*

*Ancient traditions, far older than Christianity, tell us that the spiritual light of our being is to be found in the heart of our inner darkness. To find it, one must search this darkness, one must descend to the depths to discover truth before one can ascend to the light.*

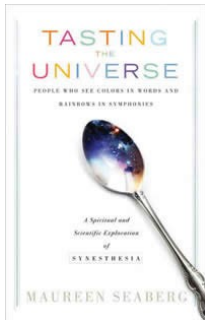

*At this special time of year, when the veils of matter are said to be a little thinner, may you have the courage to dig deep and discover the true potential of your birthright!*

*However, be sure to surface occasionally to read a good book! We have selected a few of our new arrivals we think you will enjoy for yourself or give as gifts.....Enjoy!*

viewing scientists as well as synesthetes - artists, writers and musicians, many of whom are familiar names to us, as well as the savant Daniel Tammet. At the end of each chapter of objective reporting, she inserts her reflections and point of view on the material covered.

The journey she takes us on is nothing short of intriguing and raises many questions not only about synesthesia but other differences of perception, as well as the paradigm shift that is occurring in science.

Brain scans and a range of diagnostics developed by scientists have proven unequivocally that the synesthetic brain is quite a different sort of brain. But it doesn't end there. There are recent studies linking synesthesia to creativity and even advanced meditative states. The Buddhist belief is that it must be present at enlightenment. Two of the scientists interviewed speculate that the colorful forms that synesthetes see - the photisms - may actually be a form of quantum awareness.

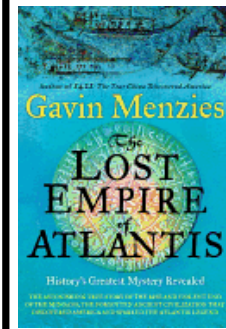

There are more questions than answers in this book - good journalistic writing with a

synesthetic flavour that will provide wonder-filled reading on those lazy summer days ahead.

## LOST EMPIRE OF ATLANTIS by Gavin Menzies

Various researchers have placed the lost civilisation of Atlantis mentioned in Plato's writings in the Atlantic, South Asia or Antarctica, to name but a few. In his latest book, Gavin Menzies, author of the best-selling **1421 The year China discovered America** revisits the idea that the fabulously wealthy Bronze

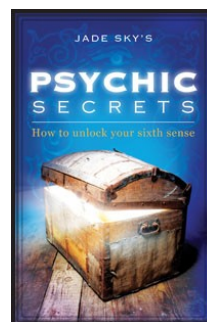

Age Minoan culture, abruptly destroyed by the eruption of the island of Thera in 1450BC, was the origin of the legends. Using his specialist knowledge of

ancient navigation and shipbuilding techniques, familiarity with Minoan culture and recent archaeological finds on Thera (now Santorini) itself, Menzies takes us on a fascinating journey of discovery into this ancient lost world. Using certain cultural markers, and the fact that the Minoans must have had a huge appetite for copper and tin, a trading empire that stretched from Lake Superior to India is uncovered. Even if this was not Atlantis, although the evidence unearthed is convincing, this book totally changes our understanding of the capabilities of these remarkable people. Fantastic holiday reading!

## PSYCHIC SECRETS How to Unlock Your Sixth Sense by Jade Sky

Connecting to your intuition can help you

navigate your way through life by giving you a deeper understanding and the skills to read subtle signals. Throughout the ages, shamans, mystics, wise men and women have helped people to get to know more about the spiritual aspects of life and how this affects the physical world

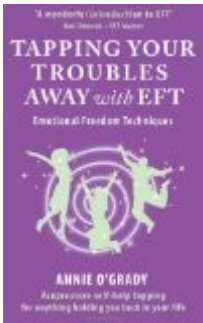

they live in.

In this workbook there are various activities and practical information to help you meet your spirit guides, see and feel auras and be able to sense things psychically. If you take the time to do the exercises - many insights (such as who your Guides are) may be revealed to you. The contents include psychic protection, tools and techniques to heighten your intuition, Esp skills, the nature of your spirit guides and ways to communicate with them. This is a light easy to read book with some fun and informative ways of recording your own journey. A great book for the summer holidays when there is a bit more time to reflect.

**TAPPING YOUR TROUBLES AWAY WITH EFT** by Annie O'Grady

Annie O'Grady is an Adelaide-based EFT coach and mentor who has worked as an alternative natural therapist for over 25 years. For the past 6 years she has specialized in EFT in her consultancy. Her passion for and commitment to this form of energy healing comes through lovingly in her book.

For those new to this acupressure self-help tapping technique she leads you through an understanding of what it is about and how to begin using it in your life. As well as teaching the basic techniques she shares stories of how others have used it to achieve remarkable results in transforming both emotional and physical states of pain. But the book offers much more than an introduction. For those who are already using EFT there are advanced techniques and applications you may never have thought about.

An excellent resource as well as a very enjoyable read!

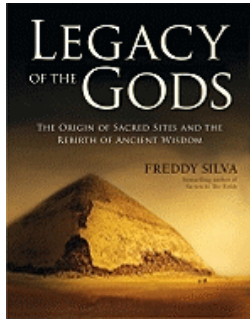

**LEGACY OF THE GODS: The Origin of Sacred Sites and the Rebirth of Ancient Wisdom** by Freddy Silva

As in his earlier book on crop circles, Freddy Silva has pulled together research of the most inclusive kind. This time he explores the archaeological and geological evidence as well as the writings in ancient texts and sacred geometry and weaves it together with the experiences of present day trance mediums. The result is a unique insight into the mind and soul of temple-building - the story of how ordinary landscapes were transformed into places of power by seven principles that were combined to transform mere stones

and subtle forces into sacred environments.

Not only is this a fascinating and thought-provoking text, it will inspire you with the desire to walk these sacred places yourself. "Intent - our silent, inner voice - is the seventh ingredient of sacred space. It glues the other principles together and brings the structure to life. . . The temple of Man and the temple of the land become an indivisible and mystical whole."

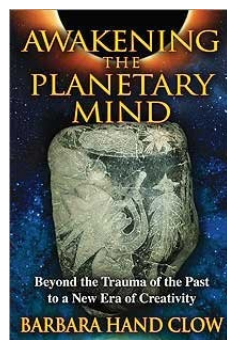

**ALEISTER CROWLEY The Biography: Spiritual Revolutionary, Romantic Explorer, Occult Master- and Spy** by Tobias Churton.

Was he a satanic imp sent to confuse, shock and disturb, or did he want to help us by shining a torch into the darkness? This new biography, using previously unpublished papers, letters and diaries seeks to establish recognition of Crowley as a major thinker, as significant as Freud or Jung. Contrary to what his detractors have long claimed, Crowley adopted a scientific approach to magick and religion in attempt to answer important questions such as: What are we here for? What is freedom? What is spiritual life? Does magick work? Who is running the world?

This book is an absorbing read- presenting a thoroughly researched, crystalline account of the intrigues, life and mystery of this remarkable man.

.....and just briefly- an new title from Barbara Hand Clow- **AWAKENING THE PLANETARY MIND: Beyond the Trauma of the Past to a New Era of Creativity** in which she explains how fears

from previous catastrophes, such as the destruction of Atlantis and the biblical flood are locked in our collective unconscious, but that we are entering a time when these memories can be healed to usher in a new age of creative

growth for humanity.....

.....DVD new releases include **Miracles, Mysteries and John of God** about the work of one the most powerful and respected healers in the world today.....

.....**The Galactic Serpent** by **Alberto Villoldo** about the legendary feathered serpent of the Americas whose arrival in 2012 has been foretold by thousands of shamans.....

.....**The Spirit Molecule**-presenting a multifaceted approach to DMT, bringing to life the awesome effects of this compound.....

.....**Kundalini-Evolution is coiled within you** follows a wealthy wife and a failing businessman as they journey, in different ways, along a path to higher consciousness which leads them to a phenomena that has existed since the beginning of man.....

We are delighted to now be stocking a range of aromatic natural soy candles. They are a cleaner burning, healthier alternative to other scented candles- eco-friendly, hand-crafted, biodegradable and perfumed with top-grade essential oils. They make wonderful gifts!

We will be closing at 4pm on Saturday Dec 24th and will re-open on Wednesday Dec 28th. We will also be closed on Sunday Jan 1st and Monday Jan 2nd

We have run out of room to accommodate our ever-popular second-hand books! After Christmas we will be having a massive sale of surplus stock to make room for new arrivals. Be sure to come in and pick up an absolute bargain!!
